DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michelle Esteban on 01/16/08.

The application has been amended as follows:

Claims 31 and 50 are cancelled.

Claim 1 (currently amended) A method for managing applications, comprising:
displaying a set of software program applications within a web browser, said set of software program applications includes at least a first software program application and a second software program application; changing a display of said first software program application; and automatically changing a display of said second software program application in response to said changing of said display of said first software program application, said first software program application and said second software program application are displayed in a display are that is fixed in size during said steps of changing a display of said first software program application and automatically changing a display of said second software program application.

Claim 26 (currently amended) One or more processor readable storage devices having processor readable code embodied on said processor readable storage devices, said processor readable code for programming one or more processors to perform a method comprising:

displaying a set of interactive applications in a web browser, said set of interactive applications includes at least a first interactive application and a second interactive application; changing a size or position of said first interactive application; and automatically changing a size or position of said second interactive application in response to said changing of said size or position of said first interactive application so that display of said first interactive application does not conflict with display of said second interactive application, display of said first interactive application conflicts with display of said second interactive application if said first interactive application overlaps with display of said second interactive application.

Claim 47 (currently amended) An apparatus that can run software program applications, comprising:
an input device;
a display device;
a storage device, said storage device stores code for said software program applications; and
a processing device in communication with said input device, said display device and said storage device, said processing device accesses said code in order to display said software program applications within a web browser on said display device, said processing device receives a request to change a display of a first software program application, said processing device automatically changes a display of a second software program application in response to said request to change said display of said first software program application so that said first software program application does not conflict with said second software program application, said first software program application does not conflict with said second software program application if display of said first software program application does not overlap with display of said second software program application.

Allowable Subject Matter

Claims 1-30, 32-49 and 51-57 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a method of changing of said size or position of said first interactive application so that display of said first interactive application does not conflict with display of said second interactive application, display of said first interactive application conflicts with display of said second interactive application if said first interactive application overlaps with display of said second interactive application. These features are not found or suggested in the prior arts.

The closest prior art Taylor discloses a conventional user interface that allows resizing and re-positioning of windows within the end user interface; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
